

# **Clinical Policy: Etanercept (Enbrel)**

Reference Number: CP.PHAR.250 Effective Date: 08.16 Last Review Date: 05.20 Line of Business: Medicaid

Coding Implications Revision Log

# See <u>Important Reminder</u> at the end of this policy for important regulatory and legal information.

## Description

Etanercept (Enbrel<sup>®</sup>) is a tumor necrosis factor (TNF) blocker.

## FDA Approved Indication(s)

Enbrel is indicated:

- For reducing signs and symptoms, inducing major clinical response, inhibiting the progression of structural damage, and improving physical function in patients with moderately to severely active rheumatoid arthritis (RA). Enbrel can be initiated in combination with methotrexate (MTX) or used alone.
- For reducing signs and symptoms of moderately to severely active polyarticular juvenile idiopathic arthritis (JIA) in patients ages 2 and older
- For reducing signs and symptoms, inhibiting the progression of structural damage of active arthritis, and improving physical function in patients with psoriatic arthritis (PsA). Enbrel can be used with or without methotrexate.
- For reducing signs and symptoms in patients with active ankylosing spondylitis (AS)
- For the treatment of patients 4 years or older with chronic moderate to severe plaque psoriasis (PsO) who are candidates for systemic therapy or phototherapy

# **Policy/Criteria**

*Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.* 

It is the policy of health plans affiliated with Centene Corporation<sup>®</sup> that Enbrel is **medically necessary** when the following criteria are met:

# I. Initial Approval Criteria

- A. Rheumatoid Arthritis (must meet all):
  - 1. Diagnosis of RA;
  - 2. Prescribed by or in consultation with a rheumatologist;
  - 3. Age  $\geq$  18 years;
  - 4. Member meets one of the following (a or b):
    - a. Failure of  $a \ge 3$  consecutive month trial of methotrexate (MTX) at up to maximally indicated doses, unless contraindicated or clinically significant adverse effects are experienced;
    - b. If intolerance or contraindication to MTX (*see Appendix D*), failure of  $a \ge 3$  consecutive month trial of at least ONE conventional disease-modifying anti-rheumatic drug [DMARD] (e.g., sulfasalazine, leflunomide, hydroxychloroquine)

at up to maximally indicated doses, unless contraindicated or clinically significant adverse effects are experienced;

5. Dose does not exceed 50 mg every week.

## **Approval duration: 6 months**

#### **B.** Polyarticular Juvenile Idiopathic Arthritis (must meet all):

- 1. Diagnosis of PJIA;
- 2. Prescribed by or in consultation with a rheumatologist;
- 3. Age  $\geq$  2 years;
- 4. Member meets one of the following (a or b):
  - a. Failure of  $a \ge 3$  consecutive month trial of MTX at up to maximally indicated doses, unless contraindicated or clinically significant adverse effects are experienced;
  - b. If intolerance or contraindication to MTX (*see Appendix D*), failure of  $a \ge 3$  consecutive month trial of sulfasalazine or leflunomide at up to maximally indicated doses, unless contraindicated or clinically significant adverse effects are experienced;
- 5. Dose does not exceed one of the following (a or b):
  - a. Adults: 50 mg every week;
  - b. Pediatrics (see Appendix E for dose rounding guidelines) (i or ii):
    - i. Weight < 63 kg: 0.8 mg/kg every week;
    - ii. Weight  $\ge$  63 kg: 50 mg every week.

## **Approval duration: 6 months**

## C. Psoriatic Arthritis (must meet all):

- 1. Diagnosis of PsA;
- 2. Prescribed by or in consultation with a dermatologist or rheumatologist;
- 3. Age  $\geq$  18 years;
- 4. Dose does not exceed 50 mg every week.

## **Approval duration: 6 months**

## D. Ankylosing Spondylitis (must meet all):

- 1. Diagnosis of AS;
- 2. Prescribed by or in consultation with a rheumatologist;
- 3. Age  $\geq$  18 years;
- Failure of at least TWO non-steroidal anti-inflammatory drugs (NSAIDs) at up to maximally indicated doses, each used for ≥ 4 weeks unless contraindicated or clinically significant adverse effects are experienced;
- 5. Dose does not exceed 50 mg every week.

# Approval duration: 6 months

## E. Plaque Psoriasis (must meet all):

- 1. Diagnosis of PsO;
- 2. Prescribed by or in consultation with a dermatologist or rheumatologist;
- 3. Age  $\geq$  4 years;
- 4. Member meets one of the following (a or b):

# CLINICAL POLICY Etanercept

- a. Failure of  $a \ge 3$  consecutive month trial of MTX at up to maximally indicated doses unless contraindicated or clinically significant adverse effects are experienced;
- b. If intolerance or contraindication to MTX (*see Appendix D*), failure of  $a \ge 3$  consecutive month trial of cyclosporine or acitretin at up to maximally indicated doses, unless contraindicated or clinically significant adverse effects are experienced;
- 5. Dose does not exceed one of the following (a or b):
  - a. Adults: 50 mg twice weekly for 3 months, followed by maintenance dose of 50 mg every week;
  - b. Pediatrics (see Appendix E for dose rounding guidelines) (i or ii):
    - i. Weight < 63 kg: 0.8 mg/kg every week;
    - ii. Weight  $\geq 63$  kg: 50 mg every week.

## **Approval duration: 6 months**

#### F. Other diagnoses/indications

1. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.PMN.53 for Medicaid.

#### **II.** Continued Therapy

- A. All Indications in Section I (must meet all):
  - 1. Currently receiving medication via Centene benefit or member has previously met initial approval criteria;
  - 2. Member is responding positively to therapy;
  - 3. If request is for a dose increase, new dose does not exceed 50 mg every week.

## **Approval duration: 12 months**

## **B.** Other diagnoses/indications (must meet 1 or 2):

- 1. Currently receiving medication via Centene benefit and documentation supports positive response to therapy.
  - Approval duration: Duration of request or 6 months (whichever is less); or
- 2. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.PMN.53 for Medicaid.

#### **III. Diagnoses/Indications for which coverage is NOT authorized:**

A. Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policies – CP.PMN.53 for Medicaid or evidence of coverage documents.

#### **IV. Appendices/General Information**

Appendix A: Abbreviation/Acronym Key AS: ankylosing spondylitis DMARD: disease-modifying anti rheumatic drug

FDA: Food and Drug Administration GI: gastrointestinal MTX: methotrexate

NSAID: non-steroidal anti-inflammatory drug PsO: plaque psoriasis PJIA: polyarticular juvenile idiopathic arthritis PsA: psoriatic arthritis RA: rheumatoid arthritis TNF: tumor necrosis factor

#### Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

| Drug Name   | Dosing Regimen                                     | Dose Limit/   |
|---|--|---------------|
| •, ,•   | P.O.   | Maximum Dose  |
| acitretin   | PsO  | 50 mg/day     |
| (Soriatane <sup>®</sup> )                           | 25 or 50 mg PO QD                                  |               |
| azathioprine  | RA   | 2.5 mg/kg/day |
| (Azasan <sup>®</sup> , Imuran <sup>®</sup> )        | 1 mg/kg/day PO QD or divided BID                   |               |
| Cuprimine <sup>®</sup>                              | RA*  | 1,500 mg/day  |
| (d-penicillamine)                                   | Initial dose:                                      |               |
|   | 125 or 250 mg PO QD                                |               |
|   | Maintenance dose:                                  |               |
|   | 500 – 750 mg/day PO QD                             |               |
| cyclosporine  | PsO  | 4 mg/kg/day   |
| (Sandimmune <sup>®</sup> ,<br>Neoral <sup>®</sup> ) | 2.5 mg/kg/day PO divided BID                       |               |
| ,   | RA   |               |
|   | 2.5 - 4  mg/kg/day PO divided BID                  |               |
| hydroxychloroquine                                  | RA*  | 600 mg/day    |
| (Plaquenil <sup>®</sup> )                           | Initial dose:                                      |               |
| (1 14440000 )                                       | $\frac{1}{400-600}$ mg/day PO QD                   |               |
|   | Maintenance dose:                                  |               |
|   | 200 – 400 mg/day PO QD                             |               |
| leflunomide   | PJIA*  | 20 mg/day     |
| (Arava <sup>®</sup> )                               | Weight $< 20$ kg: 10 mg every other day            | _ ·           |

|                            | 2 g/day PO in divided doses         |                             |

Therapeutic alternatives are listed as Brand name<sup>®</sup> (generic) when the drug is available by brand name only and generic (Brand name<sup>®</sup>) when the drug is available by both brand and generic. \*Off-label

#### Appendix C: Contraindications/Boxed Warnings

- Contraindication(s): patients with sepsis
- Boxed warning(s):
  - Serious infections
  - Malignancies

## Appendix D: General Information

- Contraindications:
  - Enbrel should not be administered to patients with sepsis.
- Definition of failure of MTX or DMARDs
  - Child-bearing age is not considered a contraindication for use of MTX. Each drug has risks in pregnancy. An educated patient and family planning would allow use of MTX in patients who have no intention of immediate pregnancy.
  - Social use of alcohol is not considered a contraindication for use of MTX. MTX may
    only be contraindicated if patients choose to drink over 14 units of alcohol per week.
    However, excessive alcohol drinking can lead to worsening of the condition, so
    patients who are serious about clinical response to therapy should refrain from
    excessive alcohol consumption.
- Examples of positive response to therapy may include, but are not limited to:
  - Reduction in joint pain/swelling/tenderness
  - Improvement in ESR/CRP levels
  - Improvements in activities of daily living
- Hidradenitis suppurativa:

- HS is sometimes referred to as: "acne inversa, acne conglobata, apocrine acne, apocrinitis, Fox-den disease, hidradenitis axillaris, HS, pyodermia sinifica fistulans, Velpeau's disease, and Verneuil's disease."
- Per the 2019 North American guidelines for HS, the limited available evidence does not support use of etanercept for HS. One randomized, double-blind, placebo-controlled study (n = 20) demonstrated no statistically significant improvement in patient or physician-reported outcomes. Other studies demonstrated either mixed evidence or the limited efficacy was determined using incompletely validated outcome measures.
- PsA: According to the 2018 American College of Rheumatology and National Psoriasis Foundation guidelines, TNF inhibitors or oral small molecules (e.g., methotrexate, sulfasalazine, cyclosporine, leflunomide, apremilast) are preferred over other biologics (e.g., interleukin-17 inhibitors or interleukin-12/23 inhibitors) for treatment-naïve disease. TNF inhibitors are also generally recommended over oral small molecules as first-line therapy unless disease is not severe, member prefers oral agents, or TNF inhibitor therapy is contraindicated.

|                 | Vial Quantity Recommendation |
|-----------------|------------------------------|
| $\leq$ 25.99 mg | 1 vial of 25 mg/0.5 mL       |
| 26 to 52.49 mg  | 1 vial of 50 mg/mL           |

# Appendix E: Dose Rounding Guidelines for PJIA and Pediatric PsO

| Dosage and Administration |   |              |  |
|---------------------------|---|--------------|--|
| Indication                | Dosing Regimen                            | Maximum Dose |  |
| RA                        | 25 mg SC twice weekly or 50 mg SC once    | 50 mg/week   |  |
| PsA                       | weekly                                    |              |  |
| AS                        | 50 mg SC once weekly                      | 50 mg/week   |  |
| PJIA                      | Weight < 63 kg: 0.8 mg/kg SC once weekly  | 50 mg/week   |  |
|                           | Weight $\geq$ 63 kg: 50 mg SC once weekly |              |  |
| PsO                       | Adults:                                   | 50 mg/week   |  |
|                           | Initial dose:                             |              |  |
|                           | 50 mg SC twice weekly for 3 months        |              |  |
|                           | Maintenance dose:                         |              |  |
|                           | 50 mg SC once weekly                      |              |  |
|                           |   |              |  |
|                           | Pediatrics:                               |              |  |
|                           | Weight < 63 kg: 0.8 mg/kg SC once weekly  |              |  |
|                           | Weight $\geq$ 63 kg: 50 mg SC once weekly |              |  |

#### V. Dosage and Administration

## VI. Product Availability

- Single-dose prefilled syringe: 25 mg/0.5 mL, 50 mg/mL
- Single-dose prefilled SureClick<sup>®</sup> autoinjector: 50 mg/ml
- Multi-dose vial: 25 mg
- Enbrel Mini<sup>TM</sup> single-dose prefilled cartridge for use with AutoTouch<sup>TM</sup> reusable autoinjector: 50 mg/mL

#### **Coding Implications**

Codes referenced in this clinical policy are for informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

| HCPCS<br>Codes | Description   |
|----------------|---|
| J1438          | Injection, etanercept, 25 mg (code may be used for Medicare when drug administered under the direct supervision of a physician, not for use when drug is self-administered) |

| Reviews, Revisions, and Approvals  | Date  | P&T<br>Approval<br>Date |
|--|-------|-------------------------|
| <ul> <li>Policy split from CP.PHAR.85.Psoriasis Treatments and</li> <li>CP.PHAR.86.Arthritis Treatments. RA, PJIA, PsA, AS, PsO: Removed criteria related to HBV, malignant disease, concomitant use with other biologics, and concurrent administration of live vaccines; added dosing requirement. PJIA: removed question related to number of affected joints; modified criteria to require trial of MTX, unless contraindicated; added sulfasalazine as an alternative to MTX if MTX is contraindicated.</li> <li>RA: changed age requirement to 18; modified criteria to require trial of MTX, unless contraindicated; added sulfasalazine as an alternative to MTX if MTX is contraindicated.</li> <li>RA: changed age requirement to 18; modified criteria to require trial of MTX, unless contraindicated; added sulfasalazine and hydroxychloroquine as an alternative to MTX if MTX is contraindicated.</li> <li>PsO: removed duration of trial for topical and phototherapy. PsA: required trial of MTX and added requirement for the following if MTX cannot be used: leflunomide, cyclosporine, sulfasalazine &amp; azathioprine.</li> <li>Re-auth: combined into All Indications; added dosing and reasons to discontinue; for PsO, changed efficacy criteria related to Psoriasis Area and Severity Index (PASI)-75 to general efficacy statement. Removed Otezla from list of therapies to trial per PDL. Modified approval duration to 6 months for initial and 12 months for renewal.</li> </ul> | 06.16 | 08.16                   |

| Criteria for hidradenitis suppurativa removed per 2019 North American guidelines for HS.   | 05.07.19 | 08.19                   |
| Removed HIM line of business.  | 12.18.19 |                         |
| 2Q 2020 annual review: no significant changes; added dose rounding guidelines for IV weight-based dosing for PJIA and pediatric PsO; references reviewed and updated.  | 02.28.20 | 05.20                   |

## **Important Reminder**

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

# CLINICAL POLICY Etanercept

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

#### Note:

**For Medicaid members**, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.
