

Clinical Policy: Sofosbuvir (Sovaldi)

Reference Number: HIM.PA.SP2

Effective Date: 08.01.16 Last Review Date: 08.24 Line of Business: HIM\*

**Revision Log** 

See <u>Important Reminder</u> at the end of this policy for important regulatory and legal information.

#### **Description**

Sofosbuvir (Sovaldi®) is hepatitis C virus (HCV) nucleotide analog NS5B polymerase inhibitor.

#### FDA Approved Indication(s)

Sovaldi is indicated for the treatment of chronic HCV infection in:

- Adult patients without cirrhosis or with compensated cirrhosis:
  - o Genotype 1 or 4 for use in combination with pegylated interferon and ribavirin (RBV)
  - o Genotype 2 or 3 for use in combination with RBV
- Pediatric patients 3 years of age and older with genotype 2 or 3 without cirrhosis or with compensated cirrhosis in combination with RBV

#### Policy/Criteria

Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with Centene Corporation<sup>®</sup> that Sovaldi is **medically necessary** when the following criteria are met:

#### I. Initial Approval Criteria\*

\*For members in **Nevada**, medical management techniques, including quantity management, beyond step therapy is not allowed.

#### A. Hepatitis C Infection (must meet all):

- 1. Diagnosis of HCV infection as evidenced by detectable serum HCV RNA levels by quantitative assay in the last 6 months;
- 2. Prescribed\* by or in consultation with a gastroenterologist, hepatologist, infectious disease specialist, or provider who has expertise in treating HCV based on a certified training program (*see Appendix F*);
  - \*This prescriber requirement does not apply to HIM Georgia
- 3. Confirmed HCV genotype is one of the following (a or b):
  - a. For adults (age  $\geq$  18 years): Genotypes 1, 2, 3, 4, 5, or 6;
  - b. For pediatrics (age  $\geq 3$  years): Genotypes 2 or 3;
  - \*Chart note documentation and copies of lab results are required
- 4. Documentation of treatment status of the member (treatment-naïve or treatment-experienced);
- 5. Documentation of cirrhosis status of the member (no cirrhosis, compensated cirrhosis, or decompensated cirrhosis);

<sup>\*</sup>These criteria do NOT apply to California Commercial Exchange Plans.

### **CENTENE**° Corporation

### CLINICAL POLICY Sofosbuvir

- 6. Member must use **sofosbuvir-velpatasvir** (Epclusa authorized generic), unless contraindicated or clinically significant adverse effects are experienced;\*
  - \* Coadministration with omeprazole up to 20 mg is not considered acceptable medical justification for inability to use Epclusa
- 7. For pediatric patients (age  $\geq$  3 years) with genotype 2 or 3: Use is in combination with RBV;
- 8. Life expectancy  $\geq$  12 months with HCV treatment;
- 9. Prescribed regimen is consistent with an FDA or AASLD-IDSA recommended regimen (*see Section V Dosage and Administration for reference*);
- 10. Dose does not exceed 400 mg per day.

#### Approval duration: up to a total of 24 weeks\*

(\*Approved duration should be consistent with a regimen in Section V Dosage and Administration)

#### B. Other diagnoses/indications (must meet all):

- 1. Member must use **sofosbuvir-velpatasvir** (Epclusa authorized generic), if applicable for the requested indication, unless contraindicated or clinically significant adverse effects are experienced;\*
  - \* Coadministration with omeprazole up to 20 mg is not considered acceptable medical justification for inability to use Epclusa
- 2. One of the following (a or b):
  - a. If this drug has recently (within the last 6 months) undergone a label change (e.g., newly approved indication, age expansion, new dosing regimen) that is not yet reflected in this policy, refer to one of the following policies (i or ii):
    - i. For drugs on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the no coverage criteria policy for the relevant line of business: HIM.PA.33 for health insurance marketplace; or
    - ii. For drugs NOT on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the non-formulary policy for the relevant line of business: HIM.PA.103 for health insurance marketplace; or
  - b. If the requested use (e.g., diagnosis, age, dosing regimen) is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized) AND criterion 2a above does not apply, refer to the off-label use policy for the relevant line of business: HIM.PA.154 for health insurance marketplace.

#### II. Continued Therapy\*

\*For members in **Nevada**, medical management techniques, including quantity management, beyond step therapy is not allowed.

#### **A.** Hepatitis C Infection (must meet all):

- 1. Member meets one of the following (a, b, or c):
  - a. Currently receiving medication via Centene benefit or member has previously met initial approval criteria;
  - b. Member is currently receiving medication and is enrolled in a state and product with continuity of care regulations (refer to state specific addendums for CC.PHARM.03A and CC.PHARM.03B);

### **CENTENE**\* Corporation

### CLINICAL POLICY Sofosbuvir

- c. Must meet both of the following (i and ii):
  - Documentation supports that member is currently receiving Sovaldi for HCV infection and has recently completed at least 60 days of treatment with Sovaldi;
  - ii. Confirmed HCV genotype is one of the following (1 or 2):
    - 1) For adults (age  $\geq$  18 years): Genotypes 1, 2, 3, 4, 5, or 6;
    - 2) For pediatrics (age  $\geq$  3 years): Genotypes 2 or 3;
- 2. Member is responding positively to therapy;
- 3. Dose does not exceed 400 mg per day.

#### Approval duration: up to a total of 24 weeks\*

(\*Approved duration should be consistent with a regimen in Section V Dosage and Administration)

#### **B.** Other diagnoses/indications (must meet 1 or 2):

- 1. If this drug has recently (within the last 6 months) undergone a label change (e.g., newly approved indication, age expansion, new dosing regimen) that is not yet reflected in this policy, refer to one of the following policies (a or b):
  - a. For drugs on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the no coverage criteria policy for the relevant line of business: HIM.PA.33 for health insurance marketplace; or
  - b. For drugs NOT on the formulary (commercial, health insurance marketplace) or PDL (Medicaid), the non-formulary policy for the relevant line of business: HIM.PA.103 for health insurance marketplace; or
- 2. If the requested use (e.g., diagnosis, age, dosing regimen) is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized) AND criterion 1 above does not apply, refer to the off-label use policy for the relevant line of business: HIM.PA.154 for health insurance marketplace.

#### III. Diagnoses/Indications for which coverage is NOT authorized:

**A.** Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policy – HIM.PA.154 or evidence of coverage documents.

#### IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key

AASLD: American Association for the

Study of Liver Diseases DAA: direct-acting antiviral

FDA: Food and Drug Administration

HBV: hepatitis B virus HCV: hepatitis C virus

HIV: human immunodeficiency virus

IDSA: Infectious Diseases Society of

America

NS3/4A, NS5A/B: nonstructural protein

PegIFN: pegylated interferon

**RBV**: ribavirin

RNA: ribonucleic acid

SVR12: sustained virologic response at 12

weeks

## CLINICAL POLICY Sofosbuvir

#### Appendix B: Therapeutic Alternatives

This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

| Drug Name               | Dosing Regimen                             | Dose Limit/ Maximum Dose  |
|-------------------------|--|---|
| sofosbuvir/             | Without cirrhosis or with                  | Adult/Peds ≥ 30 kg: sofosbuvir 400                                |
| velpatasvir             | compensated cirrhosis,                     | mg /velpatasvir 100 mg (one tablet)                               |
| (Epclusa <sup>®</sup> ) | treatment naïve or treatment experienced*: | per day;  |
|                         | Genotypes 1 through 6                      | Peds 17 to < 30 kg: sofosbuvir 200 mg /velpatasvir 50 mg per day; |
|                         | One tablet PO QD for 12                    |   |
|                         | weeks                                      | Peds < 17 kg: sofosbuvir 150 mg                                   |
|                         |  | /velpatasvir 37.5 mg per day                                      |

Therapeutic alternatives are listed as Brand name<sup>®</sup> (generic) when the drug is available by brand name only and generic (Brand name<sup>®</sup>) when the drug is available by both brand and generic.

#### Appendix C: Contraindications/Boxed Warnings

- Contraindication(s): When used in combination with peginterferon alfa/RBV or RBV alone, all contraindications to peginterferon alfa and/or RBV also apply to Sovaldi combination therapy.
- Boxed warning(s): risk of hepatitis B virus (HBV) reactivation in patients coinfected with HCV and HBV

Appendix D: Direct-Acting Antivirals for Treatment of HCV Infection

| Brand           | Drug Class        |   |  |                                      |                    |

| Epclusa*        | Velpatasvir       | Sofosbuvir  |  |                                      |                    |
| Harvoni*        | Ledipasvir        | Sofosbuvir  |  |                                      |                    |
| Mavyret*        | Pibrentasvir      |   |  | Glecaprevir                          |                    |
| Sovaldi         |                   | Sofosbuvir  |  |                                      |                    |
| Viekira<br>Pak* | Ombitasvir        |   | Dasabuvir  | Paritaprevir                         | Ritonavir          |
| Vosevi*         | Velpatasvir       | Sofosbuvir  |  | Voxilaprevir                         |                    |
| Zepatier*       | Elbasvir          |   |  | Grazoprevir                          |                    |

<sup>\*</sup>Combination drugs

<sup>\*</sup>From clinical trials, treatment-experienced refers to previous treatment with NS3/4A protease inhibitor (telaprevir, boceprevir, or simeprevir) and/or peginterferon/RBV unless otherwise stated.

### **CENTENE**\*

## CLINICAL POLICY Sofosbuvir

#### Appendix E: General Information

- <u>Unacceptable medical justification for inability to use Epclusa (preferred product):</u>
  - Coadministration with omeprazole up to 20 mg is not considered acceptable medical justification for inability to use Epclusa.
    - Per the Epclusa Prescribing Information: "If it is considered medically necessary to coadminister, Epclusa should be administered with food and taken 4 hours before omeprazole 20 mg."
- HBV reactivation is a Black Box Warning for all direct-acting antiviral drugs for the
  treatment of HCV. HBV reactivation has been reported when treating HCV for patients
  co-infected with HBV, leading to fulminant hepatitis, hepatic failure, and death, in some
  cases. Patients should be monitored for HBV reactivation and hepatitis flare during HCV
  treatment and post-treatment follow-up, with treatment of HBV infection as clinically
  indicated.

• Child-Pugh Score

|                | 1 Point             | 2 Points         | 3 Points           |
|----------------|---------------------|------------------|--------------------|
| Bilirubin      | Less than 2 mg/dL   | 2-3 mg/dL        | Over 3 mg/dL       |
|                | Less than 34 umol/L | 34-50 umol/L     | Over 50 umol/L     |
| Albumin        | Over 3.5 g/dL       | 2.8-3.5 g/dL     | Less than 2.8 g/dL |
|                | Over 35 g/L         | 28-35 g/L        | Less than 28 g/L   |
| INR            | Less than 1.7       | 1.7 - 2.2        | Over 2.2           |

|                |                     | controlled       | poorly controlled  |
| Encephalopathy | None                | Mild / medically | Moderate-severe /  |
|                |                     | controlled       | poorly controlled. |
|                |                     | Grade I-II       | Grade III-IV       |

Child-Pugh class is determined by the total number of points: A = 5-6 points; B = 7-9 points; C = 10-15 points

#### Appendix F: Healthcare Provider HCV Training

Acceptable HCV training programs and/or online courses include, but are not limited to the following:

- Hepatitis C online course (https://www.hepatitisc.uw.edu/): University of Washington is
  funded by the Division of Viral Hepatitis to develop a comprehensive, online self-study
  course for medical providers on diagnosis, monitoring, and management of hepatitis C
  virus infection. Free CME and CNE credit available.
- Fundamentals of Liver Disease (https://liverlearning.aasld.org/fundamentals-of-liver-disease): The AASLD, in collaboration with ECHO, the American College of Physicians (ACP), CDC, and the Department of Veterans Affairs, has developed Fundamentals of Liver Disease, a free, online CME course to improve providers' knowledge and clinical skills in hepatology.
- Clinical Care Options: http://www.clinicaloptions.com/hepatitis.aspx
- CDC training resources: https://www.cdc.gov/hepatitis/resources/professionals/trainingresources.htm

### **CENTENE**° Corporation

## CLINICAL POLICY Sofosbuvir

Appendix G: Incomplete Adherence and AASLD-IDSA Recommended Management of Treatment Interruptions

- There are minimal data regarding the outcome of patients who have incomplete adherence to direct-acting antiviral (DAA) therapy or the threshold level of adherence below which the incidence of sustained virologic response at 12 weeks (SVR12) is significantly reduced. In general, a treatment interruption of < 7 days is unlikely to impact SVR12.
- There are few data on which to base recommendations regarding how to manage patients who have discontinued DAAs for several days to weeks. The below recommendations are applicable to treatment-naive patients with HCV, without cirrhosis or with compensated cirrhosis, receiving either Mavyret or Epclusa. Patients with prior DAA treatment, or receiving other DAA treatment regimens, or other populations (e.g., patients who are posttransplant or have decompensated cirrhosis) should be managed in consultation with an expert.
  - o Interruptions during the first 28 days of DAA therapy:
    - If missed ≤ 7 days, restart DAA therapy immediately and complete therapy for originally planned duration (8 or 12 weeks).
    - If missed ≥ 8 days, restart DAA therapy immediately and obtain HCV RNA test as soon as possible. If HCV RNA is negative, complete originally planned DAA treatment course (8 or 12 weeks). Recommendation to extend DAA treatment for an additional 4 weeks for patients with genotype 3 and/or cirrhosis. If HCV RNA is positive or not obtained, extend DAA treatment for an additional 4 weeks.
  - o Interruptions after receiving  $\geq$  28 days of DAA therapy:
    - If missed ≤ 7 days, restart DAA therapy immediately and complete therapy for originally planned duration (8 or 12 weeks).
    - If missed 8-20 consecutive days, restart DAA therapy immediately and obtain HCV RNA test as soon as possible. If HCV RNA is negative, complete originally planned DAA treatment course (8 or 12 weeks). Recommendation to extend DAA treatment for an additional 4 weeks for patients with genotype 3 and/or cirrhosis. If HCV RNA is positive or not obtained, stop treatment and retreat according to the recommendations in the AASLD-IDSA Retreatment Section.
    - If missed ≥ 21 consecutive days, stop DAA treatment and assess for SVR12. If SVR12 not achieved, retreat according to the recommendations in the AASLD-IDSA Retreatment Section.

V. Dosage and Administration

#### **Important Reminder**

This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice

### CLINICAL POLICY Sofosbuvir

current at the time that this clinical policy was approved. "Health Plan" means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan's affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions, and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment, or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members, and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.
